

Give students more than just grades to show on their resume. Track and present the subjective concerns of future employers. Students stand out with credentials showing skills in behavior, attitude, and appreciation for the work environment.

HOW DOES IT WORK?

Teachers do 30 second student micro-assessments from a web browser. Mr. Elmer automatically analyzes this data and builds reports for each student. Give these reports to the student or submit to a potential employer.

Schedule when the assessments are requested. Do them daily, weekly, monthly, or any schedule that suits your needs. We make continual data collection easy for teachers with just seconds to submit and no disruptions to instructional time.

Access the results at any time from the web. Get student reports or submit data from your laptop, phone, or tablet.

WHAT TO TRACK AND WHEN?

You set what is important. Define school-wide and student-specific behaviors. Cover an entire career program with a common set of behaviors for each student. Customize a student to have behaviors specific to their unique career path or needs.

SAMPLE EMPLOYABILITY FACTORS

- Attendance
- Prompt to class
- Shows initiative
- Contributing member in a group
- Communicates effectively
- Courteous
- Turns in assignments on time
- Learns new tasks quickly

HOW TO START?

Get a free account for a grading period and start collecting data.

Manage teachers, students, and behaviors from our self-service portal. You can even integrate your student information system data for fast setup!
